شرکت ایمن داتیس آسیا با اتکابر دانش روز، فعالیت مستمر و با همکاری نیروهای فوق تخصص، هم اینک در زمرة شرکت های برتر بخش خصوصی در زمینه صنعت ایمنی و آتش نشانی سناخته می شود. این مجموعه همواره در تلاش است که به صورت مستمر و یوپا در گسترش زیرساخت های ایمنی و آتش نشانی کشور عزیزان ایران ایفای نقش نموده و در راستای تحقق اهدافی همچون توسعه و صنعتی سازی فناوری های نوین گام هایی بزرگ ببردارد.

مدیران و کارشناسان این شرکت با تکیه بر تجربیات، توانمندی ها و فن آوری های روز دنیا که از طریق شرکت در دوره های آموزشی مختلف داخلی و خارجی همچون NFPA و حضور و فعالیت در نمایشگاه های تخصصی داخل و خارج از کشور به دست آمده است، نسبت به ارائه راهکارهای جامع ایمنی، طراحی، مشاوره، تامین تجهیزات، اجرا و نصب سیستم ها، ارزیابی ریسک ایمنی و حریق و نظارت بر پروژه های متنوع اعلام و اطفاء، حریق و تاسیسات اقدام می نمایند.

همچنین در همین راستا شرکت ایمن داتیس با اعتقاد راسخ به سیستم های مدیریتی یکپارچه مفتخر به اخذ گواهینامه IMS شده است که شامل استانداردهای ISO9001 و ISO14001 و ISO45001 و HSEMS نیز یکی دیگر از افتخارات این شرکت می باشد. همچنین شرکت دارای تأییدیه رسمی سازمان آتش نشانی می باشد.

شایان ذکر است دپارتمان بازرگانی شرکت ایمن داتیس آسیا با ایجاد ارتباط سازنده با تولیدکنندگان داخلی و خارجی در کمترین زمان ممکن نسبت به تامین و تهییه تجهیزات با تأییدیه های بین المللی نظیر NFPA UL FM VDS BS/EN برای تمامی پروژه ها اقدام می نماید، که در همین راستا شرکت ایمن داتیس دارای نمایندگی فروش و با اندصاری فروش و خدمات پس از فروش چندین برنده معتبر اروپایی، اماراتی و هندی در کشور عزیزان است که همین مهم موجبات اطمینان خاطر خریداران این تجهیزات را در جهت خدمات پس از فروش برآورده می آورد.

برندهایی که ایمن داتیس آسیا با آنها همکاری دارد:

Water supply pump LUBI . India

Fire pump LUBI .. UL/FM . India

Safex Firevalve .. UL/FM . India

FM200 system AIRFIRE .. UL/FM . Spain

Emergency light GULFLIGHT .. UL/FM . UAE

Pump control panel TORNATECH .. UL/FM . Canada

از دیگر خدماتی که شرکت ما مفتخر به انجام آن می‌باشد می‌توان از موارد زیر نام برد:

طراحی و فروش و ارائه خدمات پس از فروش جهت فروندگاهها و

آشیانه‌های هوایپیما طبق الزامات NFPA409

فروش و ساخت انواع پمپ و بوستر پمپ‌های آتش‌نشانی جهت پروژه‌های مسکونی، اداری و تجاری

فروش و ساخت انواع پمپ و بوستر پمپ‌های آتش‌نشانی جهت پروژه‌های صنعتی و صنایع هاینک

فروش و ساخت انواع پمپ و بوستر پمپ آبرسانی جهت پروژه‌های مسکونی، اداری و تجاری

فروش و ساخت انواع پمپ و بوستر پمپ آبرسانی جهت پروژه‌های صنعتی و صنایع هاینک

طراحی و فروش و ارائه خدمات پس از فروش سکوهای نفتی و سکوهای گازی و ترکیبی

طراحی و فروش و ارائه خدمات پس از فروش صنایع پتروشیمی، پالایشی و پالایشگاهی

فروش و نصب و راهاندازی سیستم‌های اعلام حریق عمومی و اختصاصی

تمامی فرآیندهای طراحی و ساخت و تسبیح پمپ‌ها در این شرکت در حال انجام و به روزرسانی می‌باشد و تمامی پمپ‌های به کار رفته دارای تائیده‌های لازم داخلی یا بین المللی می‌باشد؛ همچنین تمامی خدمات فروش، خدمات پس از فروش و تامین قطعات و لوازم یکی این برندها (حتی با وجود تحریم‌ها) توسط شرکت ایمن داتیس در حال انجام می‌باشد.

## ABOUT IMEN DATIS ASIA

شرکت ما مفتخر است که مشاوره و طراحی در زمینه سیستم‌های اعلام حریق اتوماتیک، پوشش‌های مقاوم در برابر حریق را به طیف گسترده‌ای از صنایع و ساختمان‌ها ارائه می‌نماید که در تهران به دلیل نیاز به تایید نقشه‌های مربوطه توسط سازمان خدمات ایمنی و آتش‌نشانی شهرداری تهران این شرکت تائیدیه‌های لازم را به عنوان نماینده کارفرما از سازمان آتش‌نشانی دریافت می‌نماید. در برخی صنایع نیز این تائیدیه از آتش‌نشانی مستقر در شهرک صنعتی و یا آن شهرستان دریافت می‌شود. که فرآیند دریافت این تائیدیه‌ها تماماً توسط شرکت (ایمن داتیس آسیا) انجام می‌پذیرد.

در راستای تامین تجهیزات متنوع برای مالکین کلیه پروژه‌ها و همچنین همکاران محترم، شرکت ایمن داتیس افتخار دارد که نمایندگی توزیع چندین بزند مختلف داخلی و خارجی را دارا می‌باشد و در سایر موارد نیز اجناس مورد نظر را به صورت دست اول و بدون واسطه در اختیار کارفرمایان گرامی قرار می‌دهد.

از دیگر بخش‌های این شرکت بخش اجرا و نصب سیستم‌های باشد، که پیش نیاز آن طراحی، مشاوره و تامین تجهیزات می‌باشد که پس از اتمام طراحی، پیمانکار اجرا و نصب می‌باشد طبق نقشه‌ها و دستورالعمل اجرایی ارائه شده توسط شرکت مشاور و طراح نسبت به اجرای زیرساخت، نصب تجهیزات و نهایت‌آهاندازی سیستم، اقدامات لازم را به عمل آورد. دپارتمان پروژه شرکت ایمن داتیس آسیا با توجه به تجربه و دانش سالیان متعددی در زمینه پیاده سازی سیستم‌های اعلام و اطفاء حریق اتوماتیک نسبت به عرضه این خدمات با کمترین زمان ممکن و بالاترین کیفیت و دستورالعمل‌های کارفرما اقدام می‌نماید.

شرکت مهندسی ایمن داتیس آسیا با بهره گیری از نیروهای متخصص در زمینه سیستم‌های ایمنی و آتش‌نشانی و اشراف بر الزامات، استانداردها و ضوابط مهندسی حریق نسبت به نظارت بر اجرا و خرید سیستم‌های اعلام و اطفاء حریق اتوماتیک در پروژه‌های صنعتی و ساختمانی اقدام می‌نماید.

با امید به آینده‌ای ایمن تر

#### Introduction

Lubi offers FLBS series state-of-the-art fire pumps with diesel Engine or electric motor driven, single-stage End-Suction pump.

These pumps are typically used in fire-fighting applications for supplying water to fire hose reels, fire hydrants or sprinkler systems.

Pumps have a discharge range from 50 to 1000 USgpm and the head range from 3.72 to 9.9 bar.

These fire pumps meet or exceed the requirements of NFPA20.

Installations of these pumps would ensure the safety of human life, buildings, and expensive equipments and plants. FLBS fire pumpset shall be used only where a positive suction is provided as specified in NFPA20.

These fire pumps typically consists of the following equipments:

- Single-Stage End-Suction pump
- Electric motor or Diesel Engine
- Cooling system for Diesel Engine
- Fuel system for Diesel Engine
- Battery for Diesel Engine electric start
- Exhaust system for Diesel Engine
- Diesel Engine / Electric Motor Fire pump controller
- Suction and Discharge pressure gauges
- Casing Relief Valve for Motor Fire pump
- Base frame

All above equipments except fuel supply tank and fire pump controller are mounted on a common base frame.

Lubi can also supply packaged fire pumping system with all required accessories ready for site installation

### Applications

The FLBS fire pumpsets are used in small capacity, diesel Engine or motor driven fire-fighting applications for supplying water to fire hose reels, fire hydrants or sprinkler systems in areas which are prone to the hazards of fire.

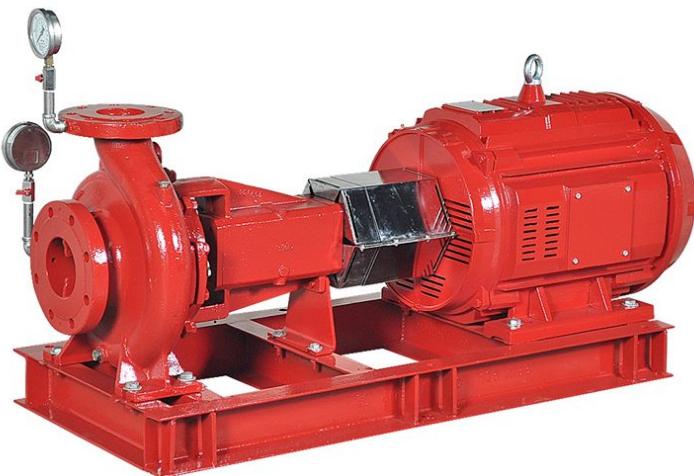

The typical applications are as follow:

- Commercial complexes & high rise buildings
- Petrochemical industries and Gas plants
- Airports and ports
- Jetties
- Marine applications
- Power stations and transformer stations
- Chemical industries
- Manufacturing plants
- Fire-work industries
- Warehouses / godowns

### Features & benefits

FLBS fire pumpset offers all the features & benefits as mentioned in our LBS standard pump series data booklet. Following are the additional features & benefits offered by these pumpsets:

- State-of-the-art design fire pumping system.
  - NFPA-20 design
  - Compact diesel Engine driven pump package
  - Rugged construction
  - More economical than Horizontal Split Case diesel fire pump packages
  - Back pull-out design which simplifies inspection and maintenance without disturbing pipe work
  - The pump impellers are dynamically balanced to grade 6.3 of ISO 1940-1
  - Efficient operation
  - Lower initial cost
  - Reduced installation time and cost
  - Easy access to all working parts
  - Ease of maintenance
  - Single source unit responsibility.
- End Suction Fire Pumps FLBS  
Type keys - Fire pump

### 1 - Impeller & Casing

- Impeller is dynamically balanced to grade G6.3 balance quality in accordance to ISO 1940-1.
- Impeller & Casing are designed using state of art CFD tools to ensure optimal performance.

### 2 - Shaft

- Heavy duty stainless steel shaft completely sealed and dry for zero corrosion.
- Short and rigid with negligible vibrations.
- Replaceable shaft protecting sleeves.
- No threads exposed to pump medium, long operating life and no corrosion.
- Adjustment-free assembly.

### 3 - Bearing

- Heavy duty and permanently grease lubricated antifriction bearings for long service life.
- Open gland, enough space for service activities.

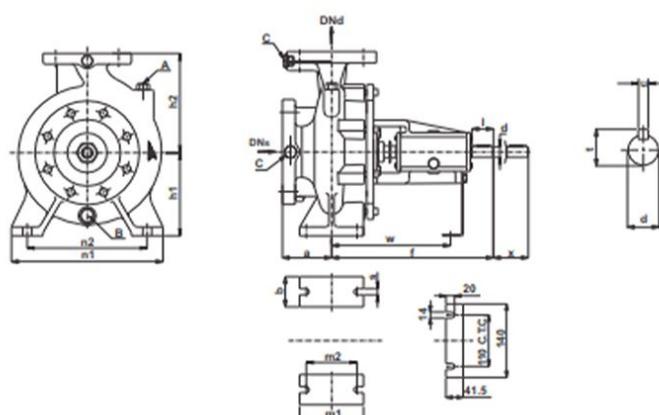

### 4 - Seal

- Asbestos - free, soft packed stuffing boxes.

### 5 - Casing

- End Suction backpullout design permits maintenance of the pump without removing the pipes.
- Rugged Ball Bearings on Drive as well as Non Drive end.
- Flange drilled as per ANSI B16.1 class 250.
- Smooth surface inside & CED coated for superior corrosion protection.
- Replaceable wear ring protect the casing and the impeller running clearances.
- Heavy duty casing design for high working pressure.

### Introduction

Lubi offers FLHC series state-of-the-art fire pumps with diesel Engine/electric motor driven, horizontal split case pump.

These pumps are typically used in fire-fighting applications for supplying water to fire hose reels, fire hydrants or sprinkler systems.

Pumps have a discharge range from 450 to 3000 USgpm and the head range from 61 to 336 psi.

These fire pumps meet or exceed the requirements of NFPA20.

Installations of these pumps would ensure the safety of human life, buildings, expensive plants and equipments. FLHC fire pumpset shall be used only where a positive suction is provided as specified in NFPA20.

The fire pumps typically consists of the following equipments:

- Pump
- Electric motor/Diesel Engine assembled with
  - cooling system (for Diesel Engine only)
  - fuel system (for Diesel Engine only)
  - battery system (for Diesel Engine only)
  - exhaust system (for Diesel Engine only)
- Fire pump controller
- Suction and discharge gauges
- Air relief valve
- Common base plate

**Note:** For your jockey pump requirements kindly refer our literature for LCR and/or LES pumps.

All above equipments except fuel supply tank and fire pump controller are mounted on a common base frame.

Lubi can also supply Packaged fire pumping system with all required accessories ready for site installation.

### Applications

The FLHC fire pumps are used in fire-fighting applications for supplying water to fire hose reels, fire hydrants or sprinkler systems in areas which are prone to the hazards of fire. The typical applications are as follow:

- Commercial complexes and high rise buildings
- Petrochemical industries and Gas plants
- Oil and Gas on-shore &off-shore platforms
- Oil terminals
- Airports and ports
- Jetties
- Marine applications
- Power stations and transformer stations
- Chemical industries
- Manufacturing plants
- Fire-work industries
- Warehouses/godowns.

### Features & benefits

FLHC fire pumps offers all features & benefits as mentioned in our LHC standard pump series data booklet. Following are the additional features & benefits offered by these pumps:

- State-of-the-art design fire pumping system.
- UL listed/FM approved/NFPA-20 design
- Diesel Engine as well as electric motor driven pump
- Rugged construction
- Liberal water passages
- Automatic air relief valve
- Efficient operation
- Lower initial cost
- Reduced installation time and cost
- Simplified piping design
- Suitable for space saving installation systems and retrofit applications
- Easy access to all working parts
- Ease of maintenance
- Single source unit responsibility.

FLHC

#### General Pump Features

#### 1 - Impeller & Casing

- Minimal axial thrust due to double-entry impeller.
- Impeller is dynamically balanced to G6.3 balance quality Grade in accordance to ISO 1940-1.
- Impeller & Casing are designed using state of are CFD tools to ensure optional performance.

#### 2 - Shaft

- Heavy duty shaft completely sealed and dry of zero corrosion.
- Short and rigid with negligible vibrations.
- Replaceable shaft protecting sleeves.
- No threads exposed to pump medium, long operating life and no corrosion.
- Adjustment-free assembly.

#### 3 - Bearing

- Heavy duty and grease lubricated antifriction Bearings for long service life.
- Open gland, enough space for service activities.

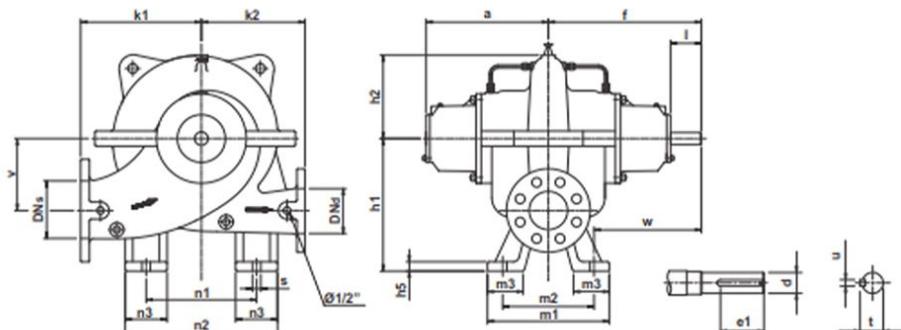

#### 4 - Seal

- Asbestos - free, potable water quality soft packed stuffing boxes.

#### 5 - Casing

- In-line axially split design which permits removal of the complete rotor without removing the pipe & motor.
- Short distance between bearings.
- Leak-tight due to compact joint flange with long Pre-stressed bolts.
- Counter-rotation possible with similar parts.
- Easy mounting self-aligning upper casing.
- Flange drilled as per ANSI B16.1 class 250.
- Smooth surface inside CED coated for superior corrosion protection.
- Replaceable wear ring protect the casing and the impeller running clearances.
- Heavy duty casing design for high working pressure.

### Vertical Multistage Centrifugal Pumps

**LCRH**

### HIGH-PRESSURE VERTICAL MULTISTAGE CENTRIFUGAL PUMPS

#### INTRODUCTION

The Lubi LCRNHS, LCRH and LCRNH series pumps are high-pressure, non-self-priming, vertical multistage centrifugal pumps with axial suction and discharge ports.

The high-pressure is achieved in two ways:

##### 1.) SINGLE PUMP SYSTEM:

In this system a standard vertical multistage centrifugal pump is fitted with a high-speed Lubi motor with integrated frequency converter.

- Type LCRNHS
- Available models: LCRNHS 1 & LCRNHS 3

##### 2.) TWO PUMP SYSTEM (FEED PUMP + HIGH-PRESSURE PUMP):

The pump consist of 2 pumps and they are installed in series. The first pump is a Feed pump which is standard vertical multistage centrifugal pump i.e. LCR, LCRN. The second pump is a High-pressure pump i.e LCRH, LCRNH especially designed for high pressure. A feed pump is connected with a high-pressure pump in series and thus high-pressure is achieved.

- Type LCRH and LCRNH
- Available models: LCRNH 3 to LCRNH 150
- LCRH 32 to LCRH 150

The high-pressure pump comes in two designs depending on pump size.

- LCRNHS 1, 3 & LCRNH 2 to 20: The chamber stack is upside-down as compared to a standard LCRN pump.
- LCRH, LCRNH 32 to 150: Standard LCR, LCRN pump with or without bearing flange.

The pressure generated by the high-pressure pump makes special demands to the design. This leaflet primarily describes the following aspects where the high-pressure pump is different from the standard pump:

- design
- operating conditions
- performance curves
- dimensions.

The performance curves show the high-pressure pump connected in series with a standard pump with various numbers of stages.

#### DESIGN FEATURES

#### APPLICATIONS

These pumps are suitable for a various types of applications demanding high-pressure, reliable and cost-efficient supply.

These pumps are suitable for a wide variety of applications from pumping of potable water to the pumping of chemicals.

Typical applications are as below:

##### Pressure boosting

- Process water systems
- Washing and cleaning systems
- High-pressure wash down systems
- Boiler feed and condensate systems.

##### Water treatment

- Ultra-filtration systems
- Reverse osmosis systems.

#### OPERATING CONDITIONS

Flow range : 0.8 to 180 m<sup>3</sup>/h

Max. operating pressure : 50 bar

Ambient temperature : Max. +40°C

Liquid temperature range: -30°C to +120°C

#### MOTOR

LCRH, LCRNH pumps are fitted with a Totally Enclosed Fan Cooled, 2-pole motors with principal dimensions in accordance with the EN standards. Electrical tolerances according to EN 60034.

Motor type	: TEFC 2-pole motor
Ratings	: 1 phase - 0.37 to 2.2 kW 3 phase - 0.37 to 75 kW
Rated speed	: 2900 rpm
Mounting designation	: Up to 4 kW - V18 and From 5.5 kW - V1
Enclosure class	: IP 55
Insulation class	: F
Efficiency class	: EFF2
Nominal voltage	: 1 phase 220-230/240 V - 0.37 to 2.2 kW 3 phase 220-240/380-415 V - 0.37 to 1.5 kW 3 phase 380-415 V - 2.2 to 75 kW
Supply frequency	: 50 Hz

#### PUMPED LIQUIDS

Thin non-explosive liquids and not containing solid particles or fibers are suitable. The liquid must also not chemically attack the pump materials. When pumping liquids with a density and/or viscosity higher than that of water, oversized motors must be used, if required. Whether a pump is suitable for a particular liquid depends on a number of factors of which the most important are the chloride content, pH value, temperature and content of chemicals, oils etc. Please note that aggressive liquids (e.g sea water and some acids) may attack or dissolve the protective oxide film of the stainless steel and thus cause corrosion.

The LCRH, LCRNH pump types are suitable for the following liquids.

##### LCRH

- Non-corrosive liquids.
- For liquid transfer, circulation and pressure boosting of cold or hot clean water.

##### LCRNHS, LCRNH

- Industrial liquids.
- In systems where all parts in contact with the liquid must be made of high-grade stainless steel.

#### OPERATING RANGE OF THE SHAFT SEAL

The operating range of the shaft seal depends on operating pressure, pump type, type of shaft seal and liquid temperature. The following temperature range apply to clean water and water with anti-freeze liquids.

SHAFT SEAL	DESCRIPTION	MAX. TEMPERATURE RANGE [°C]
HBOE	Cartridge type shaft seal, Carbon/SiO/SS 316/EPDM	0°C to +120°C
HQQE	Cartridge type shaft seal, SiC/SiC/SS 316/EPDM	-40°C to +120°C
HBQV	Cartridge type shaft seal, Carbon/SiO/SS 316/FKM	0°C to +90°C
HQQV	Cartridge type shaft seal, SiC/SiC/SS 316/FKM	-20°C to +90°C

## Horizontal Split Case Pumps

**LHC**

**HORIZONTAL SPLIT CASE PUMPS**

### INTRODUCTION

The Lubi LHC series are horizontal split case pumps. The pumps have horizontal pump shaft and the volute casing can be dismantled in the horizontal plane along the drive shaft.

LHC pumps are available in two main designs.

- Single-stage
- Two-stage

### APPLICATIONS

- Water supply.
- Pressure boosting for high rise buildings, hotels industry etc.
- Industrial washing & cleaning systems.
- Fire protection systems.
- Cooling & Air Conditioning systems.
- Boiler feed and condensate transfer system.
- Irrigation systems for fields, including sprinkler & drip irrigation systems.

### FEATURES AND BENEFITS

- The pumps are non-self priming, horizontal, split case pumps with radial suction port and radial discharge port.
- Standard flanges for suction and discharge ports will be PN 16 as per DIN standard EN 1092-2 and PN 25 as per DIN standard EN 1092-2, ANSI 125 and ANSI 250 as per ASME B16.1 are available on request.
- These pumps are long coupled pumps with TEFC squirrel cage induction motor with main dimensions complying to IEC standards and mounting designation B3 (IM 1001).
- These pumps are available with gland packing as well as mechanical shaft seal.
- The pump impellers are dynamically balanced to grade 6.3 of ISO 1940.
- These pumps can be supplied as a complete unit with motor, coupling, coupling guard and fabricated steel base frame.
- These pumps are available with our standard range of EFF2 motors. They can also be supplied with EFF1 motors on request.
- The split case construction enables removal and dismantling of the internal pump parts e.g. bearings, wear rings, shaft seal and impeller without disturbing the motor & pipe work.

### OPERATING CONDITIONS

Flow range	: 20 to 2700 m³/h
Head range	: 4 to 160 metres
Ambient temperature	: Max. + 45°C for EFF2 motors, Max. + 60°C for EFF1 motors.
Liquid temperature range:	0°C to +90°C (with Carbon/Ceramic/NBR/S.S.304 seal) 0°C to +90°C (with SiC/SiC/Viton/S.S.316 seal) 0°C to +140°C (with Carbon/SiC/Viton/S.S.316 seal)

### MOTOR

Motor type	: TEFC squirrel cage induction motor
Ratings	: 3 to 315 kW
Rated speed	: 2900, 1450, 960 rpm
Enclosure class	: IP 55
Insulation class	: F
Nominal voltage	: 3 phase 400 V
(Tolerance +5% / -10%)	
Supply frequency	: 50 Hz
Duty / Rating	: S1 / Continuous
Direction of rotation	: Clockwise as seen from the motor rear end

### PUMPED LIQUIDS

LHC pumps are designed for non explosive liquids which are clean and thin without any solid particles. For aggressive liquid please ensure that material of construction is suitable for liquid to be pumped.

If liquids with a viscosity higher than that of water, are to be pumped the power consumption of the pump will increase with increase in viscosity. This will require a large motor for the pump. Head, discharge and pump efficiency will reduce with increase in viscosity.

When pumping liquids with a density higher than that of water, the power consumption of the pump will increase at a ratio corresponding to increase in density.

### VOLUTE CASING

The volute casing of the pumps are designed to be robust in construction to take the undue stress offered by the pipe work. They have a radial suction port and radial discharge port. Standard flanges are PN 16 as per DIN standard EN 1092-2 and PN 25 as per DIN standard EN 1092-2, ANSI 125 and ANSI 250 as per ASME B16.1 are available on request. The volute casings are provided with a priming and drain hole closed by plugs. The single-stage pumps are of the inline (symmetric) design, whereas the two-stage pumps have asymmetric design.

### SHAFT

The shaft is available in carbon steel as well as stainless steel. A bronze or stainless steel shaft sleeve is provided in the stuffing box to protect the shaft from wear & corrosion. As shaft and bearings are strong and properly sized the pump can be driven by a belt drive or diesel engine without any problem. A water thrower is provided on the shaft to prevent liquid from entering the bearing housing and damaging the bearing. The shaft is supported by bearings at both drive end and non-drive end of the pump.

### BEARINGS

The pumps are fitted with two standard single-row deep groove ball bearings, the bearings are of the open type permitting the bearings to be relubricated. The bearings are lubricated by Lubi prior to delivery.

### IMPELLER

The impeller is a closed impeller with single or double curved blades and extra smooth surface finish and machined completely from outside to ensure high efficiency.

The impeller comes in two variants.

- Double-suction impeller with inflow of liquid from both sides.  
Double suction impellers are used in single-stage pumps only.
- Single-suction impeller with inflow of liquid from one side.  
Single-suction impellers are used in two-stage pumps only.

Because of hydraulic balancing the axial thrust on bearings are compensated giving a longer bearing life.

Two stage pumps have two laterally reversed single-suction impellers mounted back-to-back.

They are dynamically balanced to grade 6.3 of ISO 1940.

All impeller can be trimmed to adopt them for the duty point requested by the customer.

Suggested trimmed impeller diameter as shown on the performance curves in data booklet are theoretical. Performance may vary from what is shown on the performance curve.

### WEAR RINGS

The pump have wear rings (pos.2) between impeller (pos.1) and volute casing.

The wear rings protect the volute casing against wear. Besides, the wear rings have a sealing function between impeller and volute casing.

When the wear rings worn out, the efficiency of the pump will be reduced, and wear rings should be replaced. The wear rings are made of same material as the impeller.

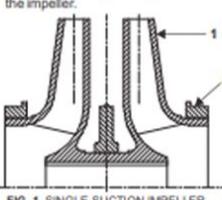

FIG. 1 SINGLE-SUCTION IMPELLER

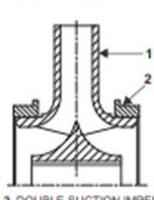

FIG. 2 DOUBLE-SUCTION IMPELLER

### COUPLING

LHC pumps are fitted with a tyre type flexible cushion coupling.

These couplings are highly flexible, resilient and absorbs large misalignment.

Due to the coupling design, the rotating assembly of LHC pumps can be removed and serviced without dismantling the motor from the base frame.

### BASE FRAME

Pump and motor are mounted on a common steel base frame in the form of welded, steel c-channel profile.

### MECHANICAL SHAFT SEAL

The shaft seal is an unbalanced, mechanical shaft seal.

Two types are available as standard:

- A rubber bellows type (M1) for single-stage and two-stage pumps.
- A cartridge type (M2) with O-ring for single-stage and two-stage pumps.

### STUFFING BOX

Stuffing boxes are available with lantern rings & graphite gland packing rings.

### TEST PRESSURE

All impellers are hydrostatic tested for leakage as per the following test pressure using water containing corrosion inhibitor at room temperature.

PRESSURE RATING	OPERATING PRESSURE	TEST PRESSURE
PN 16	16 bar	24 bar
PN 25	25 bar	37.5 bar
ANSI 125	125 psi	188 psi
ANSI 250	250 psi	375 psi

### MOTORS

The motors are squirrel cage induction motors, Totally Enclosed Fan Cooled with main dimensions to IEC standards.

The standard motors with the pumps are all as per EFF2 efficiency. EFF1 efficiency motors can be available on request.

### COUNTER FLANGES

Cast iron pumps (version A,B,C,D): For threaded connection, flanges are made of cast iron. For welding connection, flanges are made of carbon steel.

A set consist of one counter flange, one gasket of rubber material and the requisite number of bolts and nuts.

### Vertical Multistage Centrifugal Pumps

**LCR**

**VERTICAL MULTISTAGE CENTRIFUGAL PUMPS**

#### INTRODUCTION

The Lubi **LCR**, **LCRI**, **LCRN** series are non-self-priming, vertical multistage centrifugal pumps.

The vertical in-line design enables the pump to be installed in a horizontal plane single system where the suction and discharge connections are in the same horizontal plane (in-line) and have the same pipe sizes. This design provides a more compact pump design saving space and easy pipe work.

The pump consists of a base and a pump head. The chamber stack and the outer sleeve are secured between the pump head and the base by means of tiebolts. All pumps are equipped with a maintenance-free mechanical shaft seal.

These pumps come with various sizes and various numbers of stages to provide the flow and the pressure for different site conditions. These pumps are suitable for a wide variety of applications from pumping of potable water to the pumping of chemicals.

These pumps are available in various material versions according to the pumped liquid.

#### Version

- LCR**: Cast iron and stainless steel EN 1.4301/AISI 304
- LCRI**: Stainless steel EN 1.4301/AISI 304
- LCRN**: Stainless steel EN 1.4401/AISI 316

LCR, LCRI pumps are suitable for non corrosive liquids.

LCRN pumps are suitable for industrial liquids in systems where all parts in contact with the liquid must be made of high-grade stainless steel.

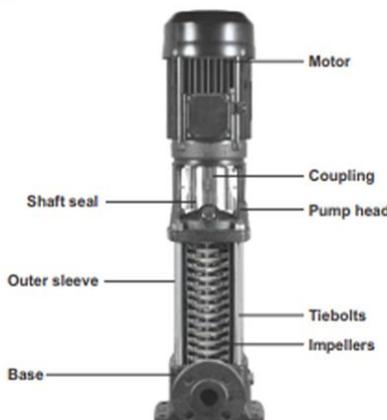

FIG. 1 LCR PUMP

#### APPLICATIONS

For thin, non-explosive, not containing solid particles or fibers, non-corrosive liquids are suitable.

For liquid transfer, circulation and pressure boosting of cold or hot clean water.

For water supply systems, pressure boosting systems, liquid transfer and irrigation works.

#### OPERATING CONDITIONS

- Flow range : 0.3 to 180 m<sup>3</sup>/h
- Head range : Up to 320 metres
- Ambient temperature : Max. + 40°C
- Liquid temperature range: -40°C to +120°C

#### MOTOR

LCR, LCRI and LCRN pumps are fitted with a Totally Enclosed Fan Cooled, 2-pole motor with principal dimensions in accordance with the EN standards.

Electrical tolerances according to EN 60034.

From 0.37 to 2.2 kW Lubi offers LCR pumps fitted with single-phase motors (1 x 220-230/240V).

Motor type	: TEFC 2-pole motor
Ratings	: 1 phase - 0.37 to 2.2 kW 3 phase - 0.37 to 75 kW
Rated speed	: 2900 rpm
Mounting designation	: Up to 4 kW - V18 and From 5.5 kW - V1
Enclosure class	: IP 55
Insulation class	: F
Nominal voltage (Tolerance ±10%)	: 1 phase 220-230/240 V - 0.37 to 2.2 kW 3 phase 220-240/380-415 V - 0.37 to 3 kW 3 phase 380-415 V - 4 to 75 kW
Supply frequency	: 50 Hz
Maximum nos. of starts/hour	: 0.37 to 4 kW - 20, 5.5 to 45 kW - 10, 55 to 75 kW - 5
Direction of rotation	: Anticlockwise as seen from the motor rear end

#### PUMPED LIQUIDS

Thin non-explosive liquids and not containing solid particles or fibers are suitable. The liquid must also not chemically attack the pump materials.

When pumping liquids with a density and/or viscosity higher than that of water, oversized motors must be used, if required.

Whether a pump is suitable for a particular liquid depends on a number of factors of which the most important are the chloride content, pH value, temperature and content of chemicals, oils etc.

Please note that aggressive liquids (e.g sea water and some acids) may attack or dissolve the protective oxide film of the stainless steel and thus cause corrosion.

The LCR, LCRI, LCRN pump types are suitable for the following liquids.

#### LCR, LCRI

- Non-corrosive liquids.
- For liquid transfer, circulation and pressure boosting of cold or hot clean water.

#### LCRN

- Industrial liquids.
- In systems where all parts in contact with the liquid must be made of high-grade stainless steel.

#### OPERATING RANGE OF THE SHAFT SEAL

The operating range of the shaft seal depends on operating pressure, pump type, type of shaft seal and liquid temperature. The following table apply to clean water and water with anti-freeze liquids.

SHAFT SEAL	DESCRIPTION	Max. temperature range [°C]
BBQE	Bellow type shaft seal, Carbon/Sic/SS 316/EPDM	-40°C to +120°C
BBQV	Bellow type shaft seal, Carbon/Sic/SS 316/FKM	-40°C to +120°C
HQQE	Cartridge type shaft seal, Sic/Sic/SS 316/EPDM	-40°C to +120°C
HQQE	Cartridge type shaft seal, Carbon/Sic/SS 316/EPDM	0°C to +120°C
HQBV	Cartridge type shaft seal, Carbon/Sic/SS 316/FKM	0°C to +90°C
HQQV	Cartridge type shaft seal, Sic/Sic/SS 316/FKM	-20°C to +90°C

#### COUNTER FLANGES

##### COUNTER FLANGES FOR LCR

A set consists of one counter flange of cast iron for threaded & carbon steel for welded connection, one gasket, bolts and nuts.

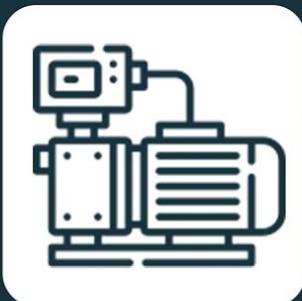

##### COUNTER FLANGES FOR LCRI, LCRN

Counter flanges for LCRI pumps are made of stainless steel according to EN 1.4301 (AISI 304) and for LCRN pump are made of stainless steel according to EN 1.4401 (AISI 316).

A set consists of one counter flange, one gasket, bolts and nuts.

### Landing Valve

# SAFEX FIRE

The **GULF FIRE®** Pressure Regulating Landing Valves are manufactured according to the specifications of **BS 5041-1:1987** Standard and certified by **BSI** for **Kitemark.** **GULF FIRE®** Pressure Regulating Landing Valves are suitable to install in Wet Riser System which have permanent Water supply. The inlet of the Landing Valves may be either Screwed or Flanged and the Outlet will be Female Instantaneous Type as per **BS 336:2010.**

#### Technical Specification:

Model No	GF-HPVS (Screwed Inlet)	GF-HPVF (Flanged Inlet)
Water Flow Rate	8.5 L/s @ Inlet Pressure 4.7 bar, Outlet Pressure > 4 bar	
Nominal Size	65 mm	
Max. Working Pressure	20 bar	
Test Pressure	Body : 30 bar , Valve Seat Test : 22.5 bar	
Flanged Inlet	BS 4504 - 2: 1974 Table : 25/21	
Screwed Inlet	BS 21	
Outlet	Bib-nose Type 2.5" Instantaneous BS 336:2010	

#### Materials For Components:

Parts	Material
Body & Outlet	Copper Alloy BS 1400 , LG2
Bonnet & Disk	Copper Alloy BS 2872 , CZ 122
Stem	Copper Alloy BS 2874 , CZ 121
Handwheel	Grey Cast Iron BS 1452 , Grade 180
Pressure Regulating Spring	Chrome Vanadium Steel BS 970-5 Grade 735 A50

Part List		Specification
1	Valve Body	Ductile Iron ASTM A 536
2	Resilient Wedge	ASTM D 2000 Ductile Iron ASTM A 536/EPDM ASTM D 2000
3	Wedge Nut	Bronze ASTM B 584 UNS C83600
4	Stem	Bronze ASTM B 150 UNS C61400
5	Bonnet Gasket	EPDM ASTM D 2000
6	Bonnet Screw	Alloy Steel ASTM A 574M Zinc Plated
7	Bonnet	Ductile Iron ASTM A 536
8	Stem Primary O-Ring	EPDM ASTM D 2000
9	Stem Thrust Washer(lower)	Bronze ASTM B 584 UNS C83600
10	Stem Thrust Washer(upper)	Stainless Steel ASTM A276 UNS S41000
11	Gland Seal O-Ring	EPDM ASTM D 2000
12	Stem Seal Bushing	Bronze ASTM B 584 UNS C83600
13	Stem Secondary O-Ring(2)	EPDM ASTM D 2000
14	Gland Flange	Ductile Iron ASTM A 536
15	Gland Flange Screw	Alloy Steel ASTM A 574M Zinc Plated
16	Stem Ring Wiper	EPDM ASTM D 2000
17	Square Operating Nut	Cast Iron ASTM A 126-B
17A	Handwheel(Optional)	Ductile Iron ASTM A 536
18	Flat Washer	Carbon Steel Zinc Plated
19	Screw	Alloy Steel ASTM A 574M Zinc Plated

S907

S907(OS&Y) GATE VALVE,  
Flanged, UL / FM,  
Rated pressure 250PSI,  
Flange Conforms to ANSI B16.1 Class125,

S907 Flanged X Flanged

Freezing Weather Precaution –  
Subsequent to testing a piping system,  
valves should be in an open position to  
allow complete drainage.

### SF CONCEALED, PENDENT, UPRIGHT & SIDEWALL STANDARD RESPONSE AND QUICK RESPONSE SPRINKLERS

Safex Standard Response Spray Sprinklers are intended for use in the Sprinkler Systems designed in accordance with the standard installation rules recognized by the applicable listing or approval agency. They are available in Pendent, Upright, Horizontal Sidewall Styles.

Safex Quick Response Spray Sprinklers are designed with a 3mm glass-bulb to react quicker at the specified temperature. They are available in Pendent, Upright, Horizontal Sidewall Styles.

During a fire conditions, the thermal-sensitive liquid in the Glass Bulb expands, causing the bulb to shatter, releasing the button and spring seal assembly. Water flowing through the Sprinkler orifice strikes the Sprinkler deflector, forming a uniform spray pattern to extinguish or control the fire.

Standard and Quick Responders are designed for use in a wide range of applications including office buildings, libraries, hotels, restaurants, banks, band shells, theaters, factories, and storehouses.

**Horizontal Sidewall Sprinkler**  
Model SF001 / SF002  
5/3mm Bulb Type, K-5.6

**Upright Sprinkler**  
Model SF003 / SF004  
5/3mm Bulb Type, K-5.6

**Pendent Sprinkler**  
Model SF005 / SF006  
5/3mm Bulb Type, K-5.6

**Concealed Pendent Sprinkles Model SF007**  
5mm Bulb Type, K-5.6

**Concealed Pendent Sprinkles Model SF008**  
3mm Bulb Type, K-5.6

**Response:** Standard/Quick  
**Coverage:**  
Water discharge is directed primarily outward and downward in a quarter spherical pattern, a portion of the spray is also directed towards the backwall.

**Installation:**  
Designed for installation along a wall or the side of a beam just beneath a smooth ceiling. (Ref.NFPA13)

**Orifice Size:**  $\frac{1}{2}"/15\text{mm}$

**Thread Size:**  $\frac{1}{2}''$  Pipe thread

**Temp. Rating:**  
135°F/57°C, 155°F/68°C  
175°F/79°C, 200°F/93°C

**Maximum Service Pressure:**  
175 psig / 1.2MPa(12bar)

**Listings and Approvals:** UL

**Finishes:**  
Natural brass, chrome plate

**Response:** Standard/Quick  
**Coverage:**  
Produce a hemispherical water distribution pattern below the deflector.

**Installation:**  
Upright installed in accordance with the standard installation rules recognized by the applicable Listing or Approval agency (Ref. NFPA 13 requirements).

**Orifice Size:**  $\frac{1}{2}"/15\text{mm}$

**Thread Size:**  $\frac{1}{2}''$  Pipe thread

**Temp. Rating:**  
135°F/57°C, 155°F/68°C  
175°F/79°C, 200°F/93°C

**Maximum Service Pressure:**  
175 psig / 1.2MPa(12bar)

**Listings and Approvals:** UL

**Finishes:**  
Natural brass, chrome plate

**Response:** Standard/Quick  
**Coverage:**  
Produce a hemispherical water distribution pattern below the deflector.

**Installation:**  
Pendent installed in accordance with the standard installation rules recognized by the applicable Listing or Approval agency (Ref. NFPA 13 requirements).

**Orifice Size:**  $\frac{1}{2}"/15\text{mm}$

**Thread Size:**  $\frac{1}{2}''$  Pipe thread

**Temp. Rating:**  
135°F/57°C, 155°F/68°C  
175°F/79°C, 200°F/93°C

**Maximum Service Pressure:**  
175 psig / 1.2MPa(12bar)

**Listings and Approvals:** UL

**Finishes:**  
Natural brass, chrome plate

**Response:** Quick  
**Coverage:**  
Produce a hemispherical water distribution pattern below the deflector.

**Installation:**  
Pendent installed in accordance with the standard installation rules recognized by the applicable Listing or Approval agency (e.g. NFPA 13 requirements).

**Orifice Size:**  $\frac{1}{2}"/15\text{mm}$

**Thread Size:**  $\frac{1}{2}''$  Pipe thread

**Temp. Rating:**  
135°F/57°C, 155°F/68°C  
175°F/79°C, 200°F/93°C

**Maximum Service Pressure:**  
175 psig / 1.2MPa(12bar)

**Listings and Approvals:** UL

**Finishes:**  
Cover plates are supplied chrome plated or with any color factory applied paint

### FIRE BOX

#### **SYNTHETIC HOSE REEL AND FIRE BOX**

Hose Reel cabinet model SF4000, SF5000 series characterised for its high quality and performance in fighting fire, can be used effectively in factories, residential building, etc.

Hose reel is made of 1 mm steel sheet and pressed out. The outer edge of the reel is rolled over to give a safe handling edge on the outer rims. The reel is mounted on swinging arm.

Hose length is 30 meter long with 1.5" or 2.5", Landing Valve 1.5" for SF4000 and 2.5" for SF5000

Model	Width	Height	Depth
SF4000	65 cm	65 cm	15 cm
SF5000	65 cm	65 cm	19 cm

#### **SYNTHETIC HOSE REEL AND EXTINGUISHER FIRE BOX**

Hose Reel and Extinguisher cabinet 1.5" size model SF4200 and 2.5" size model SF5200 are characterized for its high quality and performance in fighting fire and can be used effectively in factories, residential buildings, schools, etc.

Hose reel is made of 1 mm steel sheet and pressed out. The outer edge of the reel is rolled over to give a safe handling edge on the outer rims. The reel is mounted on swinging arm.

Model	Width	Height	Depth
SF4200	90 cm	65 cm	18 cm
SF4400	85 cm	65 cm	18 cm
SF4600	85 cm	90 cm	22 cm
SF5200	90 cm	65 cm	19 cm
SF5400	85 cm	65 cm	19 cm
SF5600	85 cm	90 cm	22 cm

### FIRE BOX

#### FOAM / WATER FIRE BOX

Foam or Water cabinet model SF9000 characterized for its high performance for attacking class A, B fire within seconds. Suitable for gas stations, petro-chemical plants, industrial premises, warehouse and in any areas, requires protection from class A, B fires.

Cabinets are manufactured from steel or stainless steel, with thickness of 1 mm to 2 mm. Cabinets are with all around folded edges without any sharp edges. The roof is slop type

Electrostatic powder painted and oven baked to 200°C for appearance and protection from rust.

Model	Width	Height	Depth
SF9000	700 mm	1120 mm Sloped Roof	300 mm

#### CUSTOMIZED FIRE BOX

Fire Cabinets model SF900 and SF900A are made with steel or stainless steel, with thickness of 1mm to 2mm.

Hose Reel Drums pressed on hydraulic press to form ribs for strength and durability to avoid twisting while handling. Outer edges of hose reels are rolled over for safe handling and aesthetic appearance. Cabinet door handles are of stainless steel and turn handle chrome plated.

Electrostatic powder painted and oven baked to 200°C for appearance and protection from rust.

Cabinets can be surface mounted, recessed or semi-recessed. Cabinets of stainless steel also available with hairline or mirror finish.

## Product data

### HVLR FOAM MONITOR VARIABLE FLOW TYPE

Monitors are generally used for protection of flammable liquid storage tank, loading areas, dykes and marine & many other industrial applications. Monitor allows application of water / foam at the right location from distance. Firetech monitors are made of Stainless-Steel body. The monitor has spray angle of 140° and it can revolve horizontally 360° & from +90° to -45° vertically.

- Variable Flow: 1000-1500-2000 GPM
- Size: 150 NB (6") flanged inlet
- Stainless Steel waterway
- Gear for horizontal and vertical movement
  - 360° continuous horizontal rotation
  - +90°, -45° vertical Rotation

### WATER CUM FOAM MONITOR

Foam monitor function same as water monitor. It could be used to discharge foam as well as water. Foam monitors are usually used where high amount of fire hazards can occurs.

Firetech manufactures UL Certified water cum foam monitor up to flow rate of 3500LPM with maximum working pressure of 12 BAR. They are available in stainless steel (SS 304 & SS 316).

- Capacity: 750 GPM
- Size: 100 (4") flanged inlet
- Stainless Steel waterway
- Gear for horizontal and vertical movement
  - 360° – Continuous horizontal rotation
  - +90°, -45° – Vertical Rotation
- Horizontal Range with water @ 30 Deg. 60 Mtr

### WATER MONITOR

#### HVLR FOAM MONITOR VARIABLE FLOW TYPE

Water monitor are located on the line proportioners which are used to spray water at various direction to extinguish fire. Due to its unique design, it has a capability to rotate in multiple directions.

Firetech manufactures ISI Certified Water monitor up to flow rate of 3500 LPM and maximum working pressure of 12 BAR. Water monitor are available in stainless steel and carbon steel with copper or aluminium alloy nozzles.

- Fixed Flow
- Available Flow: 1750 / 2580 / 3500 LPM
- Barrel Diameter Size: 63 NB, 80 NB & 100 NB
- Inlet Flange Size: 100 NB
- Barrel Construction: Carbon Steel / SS 304 / SS 316
- Nozzle Construction: Aluminium / SS 304 / SS 316

#### REMOTE OPERATED WATER CUM FOAM MONITOR

High Volume Remote Operated Monitors from Firetech are designed to be mounted at elevated positions for fixed applications. These monitors can be programmable for oscillation, as well be overridden to be operated remotely through the use of switches on a control panel. Apart manual operation can also be accomplished through the hand-wheels.

Firetech Remote operated are ideal discharge devices of water and foam solutions for fighting fire especially when reach of Operator or Firemen is limited in flammable or toxic chemical vapour and other hazards to protect refineries, chemical processing areas, ship loading docks, etc.

Electric Components can be with Ex-d (Flame Proof / Explosion Proof) Certifications like ATEX, PESO etc for Applications in Hazardous Area. Monitors with Remote Control Mechanism can be stand-alone or Multiple Monitors can be controlled with single control panel.

- Flow: 750, 1000, 1500, 2000 GPM
- Stainless Steel waterway
- Motor operated horizontal and vertical movement
  - 360° continuous horizontal rotation
  - +90°, - 45°- vertical Rotation
- Electric Components – ATEX, PESO etc

### BLADER TANK

#### HORIZONTAL AND VERTICAL BLADDER TANKS – PRE-PIPED

FIRETECH Bladder Type Foam Proportioning Unit (Bladder Tank) is provided for accurate foam proportioning of the foam concentrate with the fire-water over a wide range of flow.

FIRETECH Horizontal and Vertical Bladder Tanks consist of the following main components i.e. Foam Vessel, Foam Bladder, Water Piping, Foam Piping, Vent & Drain Valves and Level Indicator.

During operation the water is charged into the bladder tank between the vessel wall and the bladder to the inlet water pressure. Bladders transfers this water pressure to the foam concentrate stored inside the bladder, this causes pressurization of the foam concentrate.

Pressurized foam concentrate is delivered to the foam concentrate inlet of the foam proportioner. A foam concentrate orifice is provided for accurate mixing of the foam concentrate into the fire-water.

The metering pressure drop is created in the foam proportioner which causes the foam concentrate to flow into the fire water stream.

Bladder tanks with horizontal layout are referred as horizontal bladder tanks. Firetech manufactures UL Certified Horizontal Bladder tank from range of 200L to 15000L capacity.

Bladder tanks are also available in vertical layout. They functions same as Horizontal Bladder Tank only difference. In vertical bladder tanks, water enters the tank from left side and forced out foam from right side or vice versa. Vertical bladder tanks are preferred in case of space constraint.

Firetech manufactures UL Certified Vertical Bladder Tank from range of 200L to 15000L capacity.

- Capacity: 53 Gal. to 4000 Gal. (200 L to 15,000 L)
- Foam Proportioners: 50 NB to 200 NB
- Wide Flow Range: 75 LPM to 30,000 LPM
- Foam Vessel: Carbon Steel / Stainless Steel
- Bladder: Nylon Reinforced Nitrile (BUNA-N)
- Designed as per ASME Sec. VIII Divl 1
- Rated Pressure: 12 BAR (175 psi)

### Standard Features

- ViZiTouch V2 operator interface
- Pressure and event recorder
- Voltage and amperage display
- Single operator for both isolating switch and circuit breaker
- Surge arrestor
- Lifting lugs
- Run test push button
- Available with automatic power transfer switch
- Emergency start handle
- Start and stop pushbuttons
- Locked rotor protector
- Phase reversal indication
- Remote start / deluge valve start provision
- Pressure transducer and run test solenoid valve externally mounted
- Gland plate
- Audible alarm
- Alarm contacts for remote indication
- Available with full voltage and reduced voltage starting

### Starting Methods

- Model GPA - Across-the-line
- Model GPY - Wye-Delta Open
- Model GPP - Partwinding
- Model GPR - Autotransformer
- Model GPW - Wye-Delta Closed
- Model GPS - Soft Start Soft Stop

شرکت این داتیس آسیا با اینکا برداش روز، فعالیت مستمر و با همکاری نیروهای فوق تخصص، هم اینک در زمرة شرکت های برتر بخش خصوصی در زمینه صنعت ایندی و آتش نشانی شناخته می شود. این مجموعه همواره در تلاش است که به صورت مستمر و پویا در گسترش زیرساخت های ایندی و آتش نشانی کشور عزیزمان ایران ایفای نقش نموده و در راستای تحقق اهدافی همچون توسعه و صنعتی سازی فناوری های نوین گام هایی بزرگ بردارد.

مدیران و کارشناسان این شرکت با تکیه بر تجربیات، توانمندی ها و فن آوری های روز دنیا که از طریق شرکت در دوره های آموزشی مختلف داخلی و خارجی همچون NFPA و حضور و فعالیت در نمایشگاه های تخصصی داخل و خارج از کشور به دست آمده است، نسبت به ارائه راهکارهای جامع ایندی، طراحی، مشاوره، تامین تجهیزات، اجراء و نصب سیستم ها، ارزیابی ریسک ایندی و دریق و نظارت بر پروژه های متنوع اعلام و اطفاء، دریق و تاسیسات اقدام می نمایند.
